

Condition monitoring solution that enables everyone to start benefitting from predictive maintenance. By combining the power of modern mobile devices and cloud we are changing the way vibration data is collected and analysed. **Vib Cloud** is powerful, yet very easy to use platform. To get started accelerometer and mobile device is all you need.

## BUSINESS BENEFITS

### REDUCE FAILURES

Early detection

### IMPROVED PLANNING

Early warning

### REDUCE DOWNTIME AND COST

Accurate Diagnostics

### IMPROVED PRODUCTIVITY

Quick results

## Lightning Fast

- Vibration measurement reinvented
- The power of latest mobile technologies
- Proven industry-grade vibration sensor
- Build for the cloud (Mobile First, Cloud First)

## Affordable

- Minimal initial capital and operating cost
- Predictable, flexible pricing
- Freedom of choice

## Vib Cloud Features

- ❖ **Collect and analyse vibration**
  - Analyse equipment vibration levels, alarms and spectra directly on the mobile device
- ❖ **Collect additional information**
  - Collect text, images, GPS location, signatures and more
- ❖ **Advanced analysis & condition assessment**
  - Drill into vibration data with spectrum analysis & record equipment condition. Use single, harmonic and sideband cursors to diagnose problems
- ❖ **Route-based inspections**
  - Efficiently plan and manage inspection routes
- ❖ **Asset register & document library**
  - Collect asset register information on the field
  - Add reference documents
- ❖ **Overview dashboard / watch list**
  - See the big picture & keep an eye on your critical equipment
- ❖ **Advanced reporting**
  - Create and share customizable reports with a few clicks
- ❖ **Interactive map**
  - Visually locate all your monitored equipment on an interactive map
- ❖ **Templates**
  - Create your own or use predefined templates for typical inspections
- ❖ **Alarms**
  - Use ISO standard or create your own alarms
